

Vantage **Plastics**: Our Facility

Vantage **Plastics**, and its subsidiary [AirPark Plastics](#) have facilities containing over 158,000 square feet of combined production, warehouse, and office space. All of which is located in Standish, Michigan conveniently positioned just off the Interstate-75 (I-75) corridor just two hours north of Detroit. Engineering, extrusion, and production are located under one roof, thus allowing for seamless transitions from design to production. Vantage **Plastics** employs over one-hundred people at these facilities and operates seven days a week to meet our customers' requirements.

Main Office:

The main office and welcome lobby (see photos below) is located on the corner of M-61 and Franklin Rd.

Warehouse:

Below is a photo of our expanded 22,000 square foot warehouse, built in 2006!

Manufacturing Floor:

Vantage **Plastics** currently houses eleven Rotary Thermoforming stations and one Single Shuttle Thermoformer.

Three Station Rotary Thermformer

Single Station Shuttle Thermoformer
